## **DETAILED ACTION**

### ***Response to Arguments***

1. Appellant's arguments, see pages 8-14, filed 8/16/2010, with respect to claims 8-22 have been fully considered and had an examiner initiated interview. An agreement was reached with respect to amending the independent claim and submission of a Terminal Disclaimer. The rejection of claims 8-22 has been withdrawn.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Yoo on 11/3/2010.

The application has been amended as follows:

Please cancel claim 9.

Please amend claims 10 and 12 to depend from claim 8.

Claim 8: A fuel cell stack comprising a plurality of planar interleaved fuel cells and interconnects and comprising a contact layer disposed between at least one electrode of a fuel cell and an adjacent interconnect, the contact layer comprising at least two outer layers and a central layer of electrically conductive materials having the central layer disposed between the two outer layers, wherein the central layer

Art Unit: 1726

comprises a stress relief layer comprised of particles of a conductive ceramic material which are coarser than in the outer layers.

### ***Reasons for Allowance***

3. Claims 8 and 10-22 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The closest prior art of record (DE 19627504; 2004/0047789 A1; US 2002/0122971 A1) do not anticipate or suggest or render obvious the invention as recited in the independent claim.

While DE '504 teaches a fuel cell stack comprising a plurality of planar fuel cells, interconnects and a contact layer having three layers; neither DE '504 nor the remaining prior art of record would reasonably lead one of ordinary skill in the art to arrive at the invention as currently claimed. For example, the prior art of record does not reasonably teach or suggest of the claimed fuel cell stack comprising a plurality of planar interleaved fuel cells and interconnects and comprising a contact layer disposed between at least one electrode of a fuel cell and an adjacent interconnect, the contact layer comprising at least two outer layers and a central layer of electrically conductive materials having the central layer disposed between the two outer layers, wherein the central layer comprises a stress relief layer comprised of particles of a conductive ceramic material which are coarser than in the outer layers. And there is nothing taught by the prior art of record to reasonably arrive at the claimed configuration.

Art Unit: 1726

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MUHAMMAD SIDDIQUEE whose telephone number is (571) 270-3719. The examiner can normally be reached on Monday-Thursday, 7:30 am to 4:00 pm EST.
